Skills

Technical Skills: Knowledge of Programming languages, efficient web-development skills and a basic understanding of various computer software and applications.

Soft Skills: Skills like adaptability, problem-solving, critical thinking and teamwork are some among many other skills.

Projects

React.Js Projects

SEPTEMBER 2020 - NOVEMBER 2020, HYDERABAD

Cloning the applications using the latest frameworks and technologies including React.js, Javascript ES6 and Firebase and replicating their basic functionalities. Some of the applications include: Twitter, Facebook, WhatsApp, Hulu.

JavaScript Projects

AUGUST 2020 - SEPTEMBER 2020, HYDERABAD

Forkify is a modern web application which is used for searching food recipes and displaying them in a user interface. It also allows users to add their own recipes and bookmark them. We use advanced javascript topics such as Promises, Async/Await and AJAX.

Motion Simulating Robot Through Hand Gestures

JANUARY 2020 - MARCH 2020, HYDERABAD

A semi-automated robotic device that takes hand gestures as input values and steers the robot in the intended direction. This is an immense aid for people for whom mobility is a great challenge. An IP camera is mounted on top for various monitoring and surveillance purposes.

Android based Student E-Bridge

OCTOBER 2019 - NOVEMBER 2019, HYDERABAD

Android application which mainly helps to improve communication between Teacher and Student. The application actually consists of 2 modules (Teacher and Student) where they can access and operate the application from their respective ends. In general, the Admin will maintain the entire administration like Authorization, Authentication, permissions, History tracking and troubleshooting etc.
